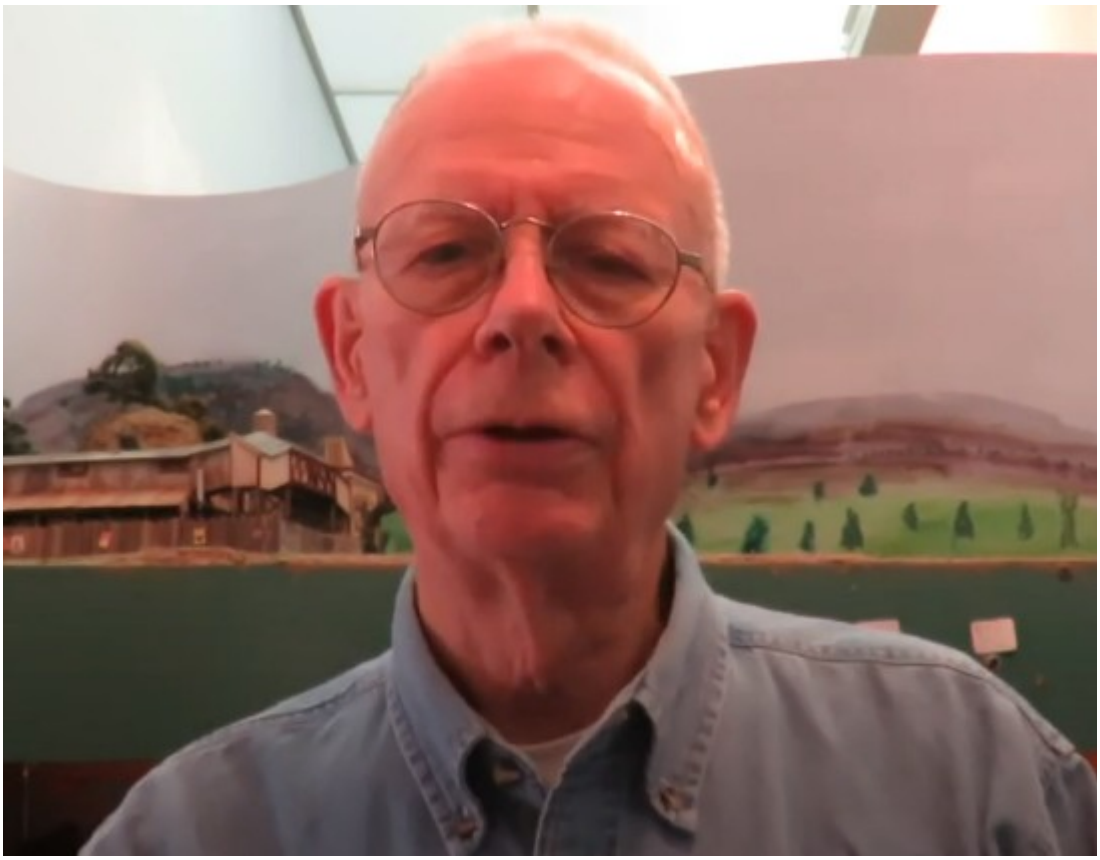
MMR_0247 William E. Wright



Bill Wright, a model railroader, is known for his impressive layouts. Let's explore a couple of them (check out YouTube!):

Green Bay Southern Layout:

Layout Size: 21x43 feet.

Construction Time: Started in January 2005.

Scale: HO scale (standard gauge).

Control: North Coast Engineering (NCE DCC).

Track Schematic: Point-to-point with a show loop.

Setting: The layout is set in 1956 in Wisconsin.

Turnouts: Mostly Micro Engineering. Turnout Controllers: A mix of hand throws and some Tortoise Switch Machines.

Scenery: Created using hydracal and ground goop.

THE SECOND LAYOUT:

Quincy to Council Bluffs Layout:

Set in July 1980.

Bill has meticulously recreated scenes and structures along the route from photos and visits to prototype sites.

The layout represents freight hauling between Quincy, Washington, and Council Bluffs, Iowa.

Bill Wright’s dedication to model railroading has left a lasting impact on the community, and his layouts continue to inspire enthusiasts.
